#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 21-34, drawn to a method for preparing a gamma delta T lymphocyte composition.

Group II, claim(s) 35-45, drawn to a method for enriching the population of functional gamma delta T lymphocytes in a biological sample.

Group III, claim(s) 46-48, drawn to a composition comprising a population of functional gamma delta T lymphocytes.

Group IV, claim(s) 49-50, drawn to a method of stimulating the immune defenses of a subject.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 21, at least, is anticipated or obvious over Kunzmann et al (Blood, 2000, *cited on IDS*). Kunzmann et al teach methods for expanding (which applicant calls preparing) a gamma delta T lymphocyte population from a biological preparation by incubating peripheral blood mononuclear cells in the presence of different bisphosphonates (which applicant calls a synthetic activator) and cytokines (See Kunzmann et al, Pg. 386, col. 1-2). Consequently, the special technical feature which links claims 21-50, stimulated (also referred to as “functional”) gamma delta T lymphocytes, does not provide a contribution over the prior art, so unity of invention is lacking.

Upon the election of Group I (claims 21-34) the following election of species is required: This application contains claims directed to more than one species of the generic invention. These species are

Art Unit: 1651

deemed to lack unity of invention because they are not so linked as to form a single inventive concept under PCT Rule 13.1.

The species are as follows:

1. Embodiments wherein the synthetic activator is a phosphohalohydrin (claim 30).
2. Embodiments wherein the synthetic activator is a phosphoepoxide (claim 30).
3. Embodiments wherein the synthetic activator is a bisphosphonate (claim 30).

Currently claim 21 is generic. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Pursuant to PCT Rule 13.2 and PCT Administrative Instructions, Annex B, Part 1(f)(I)(B)(2), the species are not art recognized equivalents.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

Art Unit: 1651

inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
